

Don't be GULLible. Use fall protection.

Fall Protection Tips

- Identify all potential tripping and fall hazards before work starts such as unprotected floor openings/edges, shafts, skylights, stairwells, and roof openings/edges.
- Select, inspect, wear, and use fall protection equipment appropriate for the task.
- Secure and stabilize all ladders before climbing them, and never stand on the top rung/step of a ladder.
- Use handrails when you go up or down stairs.
- Practice good housekeeping when working around unprotected floor openings/edges ect.

Keep cords, welding leads and air hoses out of walkways or adjacent work areas.

Fall Protection Means Safety is no accident!

Safety Depends on You
